

BEE SWARM INFORMATION

Swarming is part of the natural reproductive life cycle of honey bees. The swarming season is usually between September and December. Listed below are various websites that may assist you to find a beekeeper to remove a swarm:

<http://www.honeybee.com.au/service/swarm/index.html>

www.dpi.nsw.gov.au/agriculture/livestock/honey-bees/general-public/bee-swarms

For NSW – please go to this website - www.beekeepers.asn.au

For QLD - Ring 13 25 23 and you will reach the call centre who will give you the names and telephone numbers of beekeepers who will go and collect swarms

For WA – check out the following:

http://www.agric.wa.gov.au/objtwr/imported_assets/content/pw/ins/hp/gn2004_010.pdf

Also your local council may have a list of beekeepers in your area.

Please Note: A swarm in cavity of a house

When the swarm is in the cavity of a house it is recommended that you seek the help of a professional pest controller to destroy the hive as it is extremely difficult and dangerous to remove a swarm from this situation.
